5 Major Problems of Evolution

We are not against science. Science simply means “to know” or “knowledge.” Even God values knowledge (Prov 1:7, Prov 2:6). However, some scientists present ‘evolution’ as a scientific fact. This is wrong. A “fact” is something that is true and proven and established beyond any doubt. Evolution has never been proven and established beyond any doubt. In fact, what we see around us are many proofs against evolution. Evolution is only a theory.

5 Major Problems with Evolution

1. Where did we come from?

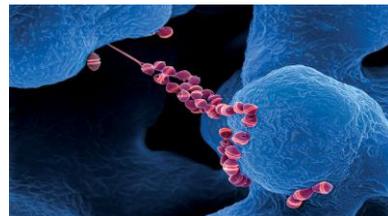

Even the most prominent scientists have no answer to this most basic yet extremely important question. Bill Nye said, “I don’t know.” Richard Dawkins said, “It is a mystery.” Virtually all evolutionists resort to ‘Big Bang’ to explain

where the universe and everything in it came from. But Big Bag has many problems. Where did the first particle come from? How did it get there? What made it heat up and explode? How could something come from nothing? How could such a great big universe come from such a small particle? “Something from nothing” is opposed to science.

2. When and how did life begin?

No evolutionist has any answer to this either. “Life from non-life” is also very much opposed to science.

3. Living Fossils

Evolutionists claim that the living things we see today came from simple, single cell molecules that evolved into more complex creatures. They present many fossils that they claim are 'million years old.' However, they have not presented any fossil to prove evolution beyond any doubt. In fact, what we find are proofs against their speculations. Here are some examples:

Fossils of coelacanth were presented as a link between fish and land creatures. They claim it had fins that look like limbs – which they allege are intermediate forms of land animal limbs. They also claim that it got extinct about 70 millions ago. To the embarrassment of the evolutionists, a coelacanth was caught alive near Madagascar in 1938. Even worse, it looks exactly as it was “70 million years ago!” If evolution is true, how come the coelacanth has not evolved in 70 million years?

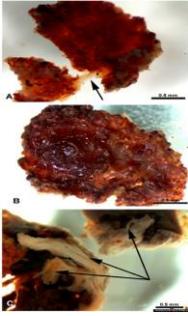

Horseshoe crab fossils are alleged to be 450 million years old. The problem is, horseshoe crabs abound today, alive and unchanged! If evolution is true, how come the horseshoe crab has not changed in 450 million years?

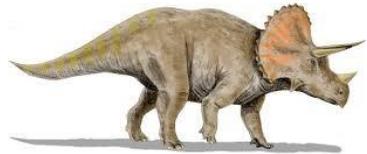

4. Soft Tissue

In 1991, an evolutionist scientist discovered soft tissue in a T Rex bone that is allegedly 68

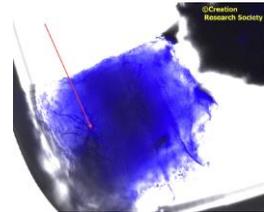

million years old. This discovery was confirmed by the scientific world. The soft tissue includes cell, blood vessels and collagen. There are 2 possible conclusions from this: either the meat can be preserved in 68 million years (which is very absurd and unscientific)

or the T Rex fossil is not 68 million years old. The evolutionists would rather opt for the absurd conclusion out of their desperation to uphold evolution.

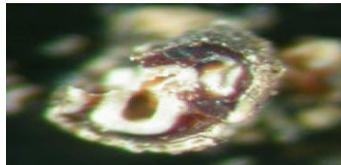

A few years after the discovery of soft tissue in T Rex fossil, another soft tissue was discovered in the same area (Hell Creek Formation, Montana, USA). This time it was from a Triceratops horn.

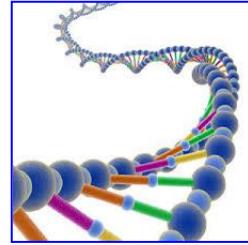

In 2006, soft bone marrow tissue was found in 7 frogs and a salamander that are allegedly 10 million years old. Even more startling, the frogs look exactly the same as they were after 10 million year?

The above discoveries can only mean one thing – the fossils are not million years old.

5. DNA

The advancement in DNA research in recent years had evolutionists scratching their heads. DNA and protein are the 2 basic parts of all living things. In simple terms, DNA is like language or code system, only extremely more complicated yet orderly and meaningfully arranged. Each creature has unique DNA. Think of DNA as

blueprint for a building. For example, humans have DNA blueprints for building hands, arm or legs. Fish have DNA blueprints for tail or fins. What is amazing is – all the blueprints for each creature are complete from the beginning. No new information is added to the DNA codes throughout the entire life of each creature. Richard Dawkins was challenged to disprove fact this and he had no reply. This is definitely a proof against evolution!

The Only Viable Option

The biblical Creation is only viable option that provides logical and reasonable answers to all 5 major problems of the evolutionists. The Bible says, God created the heavens and the earth (Genesis 1:1). God created all the living things as

we see them today. The same Bible that reveals to us the origin of life and the universe is the same Bible that tells us of the Good News of Salvation. The Bible says we are all sinners who deserve punishment but God offers us free gift of eternal life through Jesus Christ (Romans 3:23, 6:23). John 3:16

says "For God so loved the world that He gave his only begotten Son that whoever believes in him should not perish but have everlasting life. If you are interested in receiving God's offer of forgiveness and eternal life and to start a personal relationship with him,

you can talk to him in this manner of prayer:

Lord Jesus, I come to you – a sinner. I acknowledge all my sins and I am sorry. Please forgive me. I trust that you died to pay for my sins and you rose again from the dead. I open my heart to you and receive you as my Lord and Savior. Amen.
